

Easy peel pouch

This is an easy peel pouch (EP) that can be easily peeled off and opened to prevent foreign matter such as film sections from entering the product.

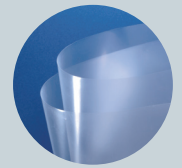

An easy-to-use innovative pouch that can be easily peeled off and opened, and the contents and film do not stick together, making it easy to peel off. Double layer structure improves pinhole resistance. The lineup includes models suitable for packaging liquids that solidify at room temperature (flower paste, cheese, etc.), and models that can handle various films suitable for packaging solid foods such as cut vegetables and frozen foods.

Pull the middle of the seal part to the left and right.

The contents will peel off naturally when you hold it at both ends and tilt it forward.

Double structure film with improved pinhole resistance

Standard size Onpack-2550

Volume : 3 - 5L

Capacity : Max.10ppm

Size pouch

Pillow pouch

Easy Open

Film width : Roll width Only 540mm
Pitch 250 - 550mm

Seal method : Vertical seal : lap seal
Horizontal seal : Single seal
(Servo motor drive) Double seal is optional

Easy peel film with excellent openability can be used, and there is no risk of contamination of the product, such as a piece of film. Ideal for packaging liquids that harden at room temperature, such as flower paste and cheese. Equipped with a protection mechanism that minimizes the impact of pouch discharge.

Rocket packaging Onpack-2550R

Volume : 2.5 - 5L

Capacity : Max.6ppm

Size pouch

Pillow pouch

Easy Open

Film width : Roll width 420 & 540mm
Pitch 250 - 580mm

Seal method : Vertical seal : lap seal
Horizontal seal : Single seal
Scraper (servo drive)

Rocket packaging without shrink film is now possible. Because it uses a two-layer double-bag easy peel film, it can be opened by hand, and there is no concern about foreign matter contamination due to film sections. It is the best model for packing the product that hardens at room temperature.

Large capacity size Onpack-5750

Volume : 5 - 10L

Capacity : Max.10ppm

Size pouch

Size pouch

Pillow pouch

Easy Open

Film width : Roll width 530 - 760mm
Pitch 450 - 700mm

Seal method : Vertical seal : lap seal
Horizontal seal : Single seal

Easy peel film with excellent openability can be used, and there is no risk of contamination of the product, such as a piece of film. Ideal for packaging liquids that harden at room temperature, such as flower paste and cheese. Equipped with a protection mechanism that minimizes the impact of pouch discharge.

Sheet packaging Onpack-5630SS III

Volume : 600mL - 2L

Capacity : Max.22ppm

Size pouch

Size pouch

Pillow pouch

Diagonal seal

Easy Open

Film width : Roll width 330 - 750mm
Pitch 250 - 450mm

Seal method : Double seal (Triple seal mechanism)

Supports a wide range of packaging from 600mL to 2L. The filling method can be selected according to the purpose, such as high-temperature, degassing filling, fixed-volume filling with molded volume plate, and weight-trend-controlled filling with a weight measuring instrument. This model is exclusively for sheet packaging.

※ Packing speed and filling volume can be varied depending on the filling product and packaging material.
