

Stand up pouch

Popular packaging that can be expected to have a high display effect.

The roll film supply method unique to Onpack can greatly reduce the packaging material running cost compared to the conventional pre-made bag making method. Pouch shape and size, design cut shape, spout shape, and other flexibility are available, and the latest technology such as ultrasonic seal unit and T-pouch are also available. Flexibility to make various choices.

An "all-in-one" model with five functions

Film supply, spout supply, bag making, filling, and design cut. Various types can be selected according to the shape and size of the pouch, the design cut shape, the shape of the spout, etc.

Ultrasonic seal

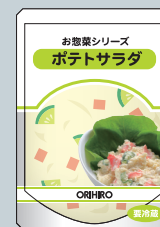

This is the latest sealing technology that enables sealing without temperature variations. Since no time is required for the temperature rise, the sealing time can be greatly shortened and productivity can be improved. There is little influence by heat conduction to the product. The horn does not generate heat, so the surrounding atmosphere can be kept at room temperature.

Stand up pouch (palm size)

A pocket-sized standing pouch that can be held with one hand. Equipped with an ultrasonic seal, achieving higher speed and improved seal quality compared to conventional machines. It can be used for various purposes such as liquid nutrition, jelly, energy gel, and toppings.

Stand up pouch for side dish

Standing pouch suitable for filling high-viscosity products such as edible sizes.

Standing pouch with no spout
